

# Parallels® RAS

An all-in-one hybrid and remote work solution

Parallels® RAS (remote application server) is a flexible virtual application and desktop delivery solution that empowers organizations of all sizes to work securely from anywhere, on any device.

## Why choose Parallels RAS

### IT agility and business readiness

Deploy core components where best suited. Mix and match workloads: hybrid, on-premises, private cloud, public cloud including Azure Virtual Desktop and AWS.

### Outstanding user experience

Access virtual desktops and applications on any device or OS, anywhere, from your browser using our Web Client, or install the local client on your device.

### Easy to deploy and manage

Simplify deployment, management, automation, and scaling through a single, centralized console or remotely via a web-based portal.

### Enhanced security

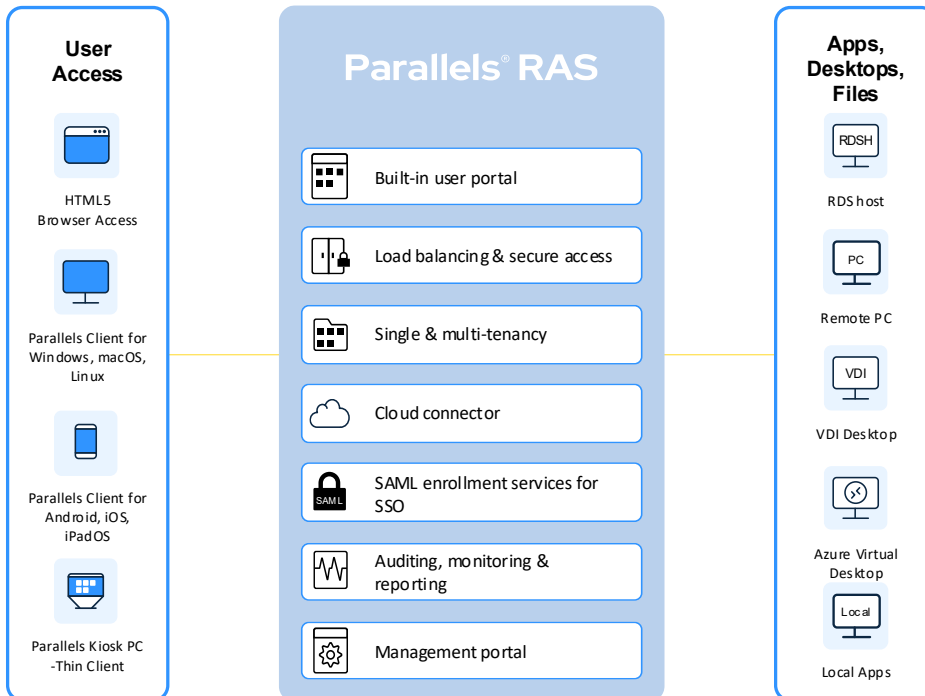

Built-in end-to-end security and compliance in Parallels RAS ensures confident deployment in any configuration.

### Total cost of ownership

Access an all-in-one remote work solution with a single license, extending hardware lifespan and modernizing legacy apps.

## Scalable, flexible architecture

## Benefits of Parallels RAS

- ✓ Freedom of choice and flexibility for deploying core components and workloads
- ✓ Hypervisor-agnostic
- ✓ Built-in high-availability and scalability
- ✓ Intuitive access for users from any device, anywhere
- ✓ Simplified secure remote access
- ✓ Easy to setup, manage, and maintain from single management console
- ✓ All-encompassing solution that provides strong TCO

# Core capabilities for secure, scalable delivery

## Simplified IT administration

Single console administrative interface

Included High Availability Load Balancer (HALB)

Dynamic scaling without complexity

Multi-tenancy on any type of infrastructure

## Unparalleled user experience

Access virtual apps and desktops without device or browser restrictions.

AI-based session pre-launch, based on user habits

Easy and fast access to local data

Flexible printer and scanning redirection

## Built-in security and compliance

Built-in MFA and integration with 3rd-party MFA providers.

Contextual access through filtering rules

User-friendly secure gateway functionality at no additional cost.

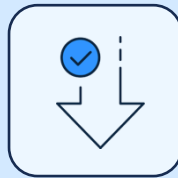

Inclusive user monitoring and forensics.

## Business impact with Parallels RAS

Accelerate time-to-market without complex VDI stacks

Reduce infrastructure and licensing costs vs traditional solutions

Enable secure SaaS transformation without app refactoring

Improve productivity with consistent cross-platform performance

Scale environments without increasing management overhead

## Customer Result:

"High-quality cross-platform support is the #1 benefit of the switch from Citrix to Parallels RAS. Now we can efficiently deliver desktops and applications to Linux, Macintosh, and Windows devices with ease."
